## FCC Telehealth funding - HERE's THE LATEST

For everyone applying for the FCC COVID-19 telehealth funding, here's the latest

The ***on-line application portal*** ***is now open; however, you can still submit using the pdf form and email*** if you would like.

***If a single health center organization with multiple sites is applying by itself***, we recommend listing the organization's main site at the "Lead Provider", and fill out all the fields below – e.g., number of patients – reflecting your entire organization. Then attach a separate piece of paper that explains that you are a single organization with multiple sites, and listing the addresses of the multiple sites, and current patient numbers for each.

There's at least one ***difference between the info requested via the on-line portal and what's requested on the pdf*** -- the portal requires each site to be listed with its own FRN, while the PDF has space for only 2 FRN's. In situations like this, we think it's best to provide more info than less -- so in this case, at the bottom of the pdf space for the two sites, write "See attached for more sites", and then attach a separate piece of paper providing all the info for each site.

***Applicants who want to submit an application via the pdf form*** available can do so here: <https://www.fcc.gov/covid-19-telehealth-program> . You should then email the application -- and, very importantly, the supporting documentation -- to [TelehealthApplicationSupport@fcc.gov](mailto:TelehealthApplicationSupport@fcc.gov)

Please continue to send Questions to: [EmergencyTelehealthSupport@fcc.gov](mailto:EmergencyTelehealthSupport@fcc.gov) or
